RAY BYRNE

Included in this auction are to be found many coins which were formerly in the collection of Ray Byrne. This consignment contains the balance of his extensive collection which will include many exciting and rare coins, such as the Cuba "Real De Eight" of 1741. There is very little that we can say about Mr. Byrne that has not already been said by leading numismatists the world over. His contributions to the field of numismatics is limitless. He has authored scores of learned articles on the coinage of the West Indies with which his name has become numismatically synonymous. His intense interest, energy, natural curiosity and scholarly research has brought to light new discoveries and knowledge that he has willingly shared with all, through his fine literary articles.

In addition to his reputation as a writer and speaker, he has served as Chairman of the U.S. Assay Commission, been a member of the A.N.A. Board of Governors, and is on the staff of the Carnegie Museum.

TERMS AND CONDITIONS GOVERNING SALE

The lots listed in this catalogue will be offered and sold subject to the following terms and conditions:

1. The highest bidder acknowledged by the auctioneer shall be the buyer. In the event of any dispute between bidders, the auctioneer's determination shall be final.
2. New bidders who have not previously established credit must furnish satisfactory references well in advance of sale date, or send a deposit of 25% of their bids, applicable to purchases. Any portion of such deposit not used will be promptly refunded after sale. We reserve the right to require payment in full before delivery of merchandise.
3. We will execute your bids without charging a commission. These bids will be treated as limits. In general, we will start a lot at a small advance over the next to the highest bid. We can neither correct nor assume responsibility for any errors as to amount or lot numbers in bid sheets, so please recheck to make sure you have bid on the exact lots you want. We will not accept bids from minors.
4. California residents must pay state sales tax. Postage and insurance will be added to invoices for lots to be mailed to successful bidders. All lots sent registered mail. **Overseas buyers must furnish their own insurance.**
5. **All items in this sale are guaranteed genuine**, and as described in the catalogue. Claims to the contrary must be made within three days of receipt by the buyer. Lots may not be returned without our written permission. No lots purchased by floor buyers may be returned. **Title remains with Superior Stamp & Coin Co., Inc., until invoices are paid in full.**
6. Auction sales are strictly for cash and lots must be paid for immediately in U.S. funds.
7. Where estimates are given, they represent either the owner's idea of value or our professional opinion as to what they should bring. **IN ANY EVENT, THEY ARE ONLY ESTIMATES AND YOU CAN BID HIGHER OR LOWER.** We recommend, however, if you want the lot, bid close to or over estimate. For some of the lots, we have indicated the number of known pieces and, in some cases, we have described certain coins as possibly the finest known. These descriptions are only the cataloguer's opinion, after much research.
8. The possibility exists that some lots could be misattributed and should this occur, mail bidders may return lots within three days of receipt. Floor bidders are urged to examine lots prior to bidding, since there are no return privileges for coins purchased on the floor.

NOTICE OF EXHIBITION

Lots will be on exhibit each day, starting May 10th through June 14th from 10 o'clock A.M. until 3:30 P.M. at our store, 517 West 7th Street, Los Angeles, California. We recommend that you call or write for an appointment to view lots. Phone (213) 627-2621. We are planning to move our location on or about June 1st to 9301 Wilshire Boulevard, Beverly Hills, California, and we suggest that you phone us to be sure of what location the lots will be on display. Our new phone number will be (213) 272-0851.

All photographs in this catalogue are of the actual lots being sold. You may bid generously with the assurance that you will buy the lots for less, if it is at all possible. Your bids are kept confidential and we will not disclose any mail bids. If you have any questions about this sale, please write or call us.

EXPLANATION OF VALUES

We estimate the value between \$100.00 and \$150.00. (\$100.00—\$150.00)
This lot should sell in excess of \$125.00 (\$125.00—UP)
We were unable to trace any prior sale for a similar specimen and thus are unable to estimate value. ()

IN ANY EVENT, THEY ARE ONLY ESTIMATES AND YOU CAN BID HIGHER OR LOWER.

FOR NEW MAIL BIDDERS

If you have never before bid by mail, an explanation is needed. Basically, the procedure is quite simple. You will notice on the enclosed Mail Bid Form a place for entering the Lot Number as well as the amount you wish to bid. After carefully reading the description of the Lot in question, simply write down the Lot Number and the maximum amount you are willing to pay in the appropriate columns. For example, let's assume you are interested in bidding on Lot No. 145. Determine the maximum price you will pay for this Lot and enter this amount on the Mail Bid Form as follows:

| Lot | Bid | Lot | Bid |
|-----|-------|-----|-----|
| 145 | 90 00 | | |
| | | | |
| | | | |

You will note we have used the term "maximum amount" above. The bid which you enter is the "maximum amount" or top price you will pay for a lot (unless you have checked one of the increase boxes). However, there is always the chance you may obtain the Lot for less! As indicated in our "Terms and Conditions Governing Sale," we act as your agent and execute your bids as if you were there in person at the Sale. We will buy the Lot for you as cheaply as possible over the next highest bid. In other words, if your bid, for example, is \$90.00 on Lot No. 145, and the next highest bid, whether by mail or floor, is only \$70.00, the Lot would be awarded to you at \$75.00, or a nominal 5% to 10% increase over the next highest bid.

Before entering your bids, please read carefully our "TERMS AND CONDITIONS GOVERNING SALE." Bidding by mail permits the individual to participate in the auction sale just as though he were able to attend the Sale in person. Many rarities are obtained through the medium of auction sales, and it can be a very exciting as well as a rewarding method of obtaining wonderful items for your collection. We look forward to your participation in our Sales.

Thank you,

DAVID DOWDY

David Dowdy, who with his brother owns a chain of 25 drug stores in North Carolina began collecting U.S. coins in 1958 and continued doing so until the 'crash' in the roll market in the sixties. Up to this point David was more of an investor than a collector.

Married and the father of three children David was involved in community affairs. He was President of the Rotary for two years, won a Distinguished Service Award from the Junior Chamber of commerce, and taught Sunday School for many years. It is probably his familiarity with the bible (both old and new testament) that triggered an interest in ancient coins that began in the late sixties.

David commenced obtaining specimens of ancient coins that were related to the bible. Naturally, a good portion of these were early Judaeans. Although not as artistically pleasing as some of the Greek and Roman coins (which are also contained in his collection) they were never-the-less even more fascinating as they tied in with his Sunday teachings. The fact that the coins were two-thousand years old and depicted the struggles, persecutions, and belief in God was so evident in the money that artistic beauty was of little significance.

Some specimens in his collection are so rare, e.g., the Salome, that comparable pieces probably number less than two or three. A special emphasis was placed on the coins of Aelia Capitolina, the Roman re-named city of Jerusalem. Once Hadrian had crushed the Bar-Kokhba Revolt, the city had the longest period of peace in its long history, 200 years.

BIBLICAL & ANCIENT COINS

The First Revolt . . .

The rock of Masada, at the eastern edge of the Judean desert with a sheer drop of more than 1,300 feet to the western shore of the Dead Sea, is a place of grand and majestic beauty. It is also the site of one of the most dramatic episodes in Jewish history.

In the 1st century AD Palestine was under the occupation of the Romans, who had overthrown the Jewish Maccabean kingdom in the middle of the previous century. Periodic rebellion by the inhabitants, who sought to regain their freedom and sovereignty, had been quickly crushed. But in the year 66 AD the Jewish revolt flared up into a full-scale country-wide war, which raged with fierce bitterness for four years, the Romans having to bring in legion after legion of reinforcements to suppress the insurgents. In 70 AD the Roman general Titus conquered Jerusalem, sacked the city, destroyed the Temple, and expelled the bulk of the Jewish survivors from the country.

One outpost alone held out till 73 AD – the fortress of Masada. According to the 1st-century historian Josephus Flavius, the first to fortify this natural defensive position was 'Jonathan the High Priest', and there was controversy among scholars as to which Jonathan he had in mind. But there was no controversy at all about the man who turned Masada into the formidable fort it became: King Herod the Great. Between the years 36 and 30 BC, Herod built a casemate wall round the top, defence towers, storehouses, large cisterns filled ingeniously by occasional rain water, barracks, arsenals and palaces. It was these fortifications and buildings which served the last band of Jewish fighters in their struggle against the Romans some seventy-five years later.

At the beginning of the 66 AD rebellion, a group of Jewish zealots had destroyed the Roman garrison at Masada and held it throughout the war. They were now – after the fall of Jerusalem – joined by a few surviving patriots from the Jewish capital who had evaded capture and made the long arduous trek across the Judean wilderness, determined to continue their battle for freedom. With Masada as their base for raiding operations, they harried the Romans for two years. In 72 AD, Flavius Silva, the Roman Governor, resolved to crush this outpost of resistance. He marched on Masada with his Tenth Legion, its auxiliary troops and thousands of prisoners of war carrying water, timber and provisions across the stretch of barren plateau. The Jews at the top of the rock, commanded by Eleazar ben Yair, prepared themselves for defence, making use of the natural and man-made fortifications, and rationing supplies in the storehouses and cisterns.

Silva's men prepared for a long siege. They established camps at the base of the rock, built a circumvallation round the fortress, and on a rocky site near the western approach to Masada they constructed a ramp of beaten earth and large stones. On this they threw up a siege tower and under covering fire from its top they moved a battering ram up the ramp and directed it against the fortress wall. They finally succeeded in making a breach.

This was the beginning of the end. That night, at the top of Masada, Eleazar ben Yair reviewed the fateful position. The defensive wall was now consumed by fire. The Romans would overrun them on the morrow. There was no hope of relief, and none of escape. Only two alternatives were open: surrender or death. He resolved 'that a death of glory was preferable to a life of infamy, and that the most magnanimous resolution would be to disdain the idea of surviving the loss of their liberty'. Rather than become slaves to their conquerors, the defenders – 960 men, women and children – thereupon ended their lives at their own hands. When the Romans reached the height next morning, they were met with silence.

The Second Revolt . . .

The Great War of the Jews against the Romans which began in AD 66 and ended in 70 – the so-called First Revolt – was quelled with terrible consequences for Judaea. Jerusalem was conquered by Titus and destroyed, and the Temple – the center of all Jewish national and religious activities – was demolished. A few years later the last resistance of the Jews was overcome at the rock fortress of Masada in the Judaeian desert; arches of triumph were erected in Rome to commemorate the victory against Judaea and coins with inscriptions 'Judaea Capta' were in currency throughout the Roman Empire.

Sixty-two years after the destruction of Jerusalem, a fresh revolt erupted against the Romans in the Holy Land. The war of Bar-Kokhba, or the so-called Second Revolt, was a cruel war, perhaps more cruel than the First Revolt. It lasted over three years with initial success for the Jews who, led by Bar-Kokhba, conquered Jerusalem and re-established the Jewish state, thus endangering the Roman Empire under Hadrian who was forced to despatch the best of his legions to Palestine to fight the rebels. Alas, this Second Revolt lacked a Josephus Flavius – the brilliant Jewish historian who described so vividly the events of the First Revolt – and thus, despite its tremendous importance, very little was known of it.

The information was so scanty that even the very name of the leader of the revolt, Bar-Kokhba, could not be ascertained. The name Bar-Kokhba - which in Hebrew or Aramaic literally means 'son of a star' obviously referring to his Messianic nature – was preserved only in the sources of the early Church Fathers. In Jewish sources on the other hand, he is referred to as Bar (or Ben) Koziba, which, though not much different in pronunciation, is quite different in meaning, i.e. 'son of a liar' or 'deceiver'. Scores of scholars have argued and debated this point for many years.

Talmudic sources refer quite frequently to what they called 'Kozbian coins', and indeed the coins of Bar-Kokhba, of which thousands have been found, were the only tangible evidence we had of the Second Revolt. All of Bar-Kokhba's coins – both silver and bronze – are struck upon Roman coins. Occasionally the figures and inscriptions of the Roman coins can be seen through the Hebrew characters. Many of the coins bear the given name of Bar-Kokhba: 'Shimeon', sometimes with the additional title 'President (or Prince: Nasi) of Israel'. Before the last discoveries this was the only source which preserved his first name. Some of the coins of the first year of the revolt bear another name: 'Eleazar the Priest'. On many of the coins the name of Jerusalem appears quite conspicuously. Of great interest also are the emblems which are struck on the coins, all indicating the Messianic nature of the war.

The allusions to Bar-Kokhba in the Jewish sources are, as we saw, ambivalent in nature: animosity towards a 'Messiah' who failed, combined with awe and admiration for a military hero. Legend has it that even Hadrian could not help admiring Bar-Kokhba's prowess and his charismatic leadership.

Amazing new discoveries were made in the desert caves of Judaea in 1960-61. Archaeologists discovered a pathetic heap of skeletons, probably refugees from Roman pursuit, a spectacular range of clothes, glass and kitchen utensils of AD 132, and an archive belonging to a woman fugitive which formed the most complete and coherent series of documents yet found from this period. This find brought Bar-Kokhba out of the shadows of legend and restored to Jewish history a real-life hero of his people.

EXTREMELY RARE 1948 PROOF SET

- 1527 — — 1948, 9 piece Proof set. Consists of farthing through halfcrown, including both Scottish and English shillings. Complete proof sets of this year are virtually unknown to most collectors and dealers alike. Recently, a large numismatic firm offered for sale proof sets of Great Britain that were previously unlisted, however, this set was not included in their offering. Quoting from ENGLISH SILVER COINAGE FROM 1649, by H.A. Seaby and P. Alan Rayner, "We believe that it is the practice of the Royal Mint nowadays to make a dozen or so proofs of each denomination every year . . ." This particular set was presented to the Superintendent of the San Francisco Mint in the late 40's by a British mint official while visiting this country. An estimated 10 complete sets were issued. To the best of our knowledge, this is the first time that a proof set of this year has ever been offered for auction. All 9 coins are lightly toned and display full proof surfaces. Accompanied by plush case, however, not an original case of issue. PHOTO (\$3000.00—UP)

2508 — — 8 Escudos, [1811 or 1812]-Mo-JJ struck over a U.S. Large cent, 1831. The Mexican dies show the armored bust of Ferdinand VII and the top portion of the mint marks. Mexican Revolutionary Coinage 1913-1917

Superior Galleries is proud to present the following offering of Revolutionary Coinage. The consignor has put together what is undoubtedly the finest collection of these coins ever offered for public sale. The basis of this collection was the fabulous F.C.C. Boyd holding, to which was added the A.J. Ostheimer and the Frank Roza collections. In all, more than 50 years of patient effort went into the perfection of this great numismatic treasure. Most of the coins offered here were used as the plate coins in the recently published work on Mexican Revolutionary Coinages by Hugh S. Guthrie and Merrill Bothamley. The numbering system of that book is used in this offering, cross referenced to other authors. We are sure that these pedigreed coins will always be avidly sought after by "aficionada" and for that reason they represent an unequaled opportunity for investment. The above mentioned book, based on this collection, is available from Superior Galleries or your local coin dealer for \$17.50.
